

Hints

- 1** Observe that $125 \times 8 = 1000$ and $25 \times 4 = 100$.

Hints

- 2** List out the colour of cap for each of them.

Hints

- 3** Find the possible numbers of B and A by listing out the calculation.

Hints

- 4** Eight 50 cents equal RM 4. Take away one 50 cents and replace it with five 10 cents. How many times should we do this until we get 24 coins in total?

Hints

- 5** Look for a pattern. The unit digit only changes among 2, 4, 8 and 6.
